

FEATURES

- ✓ Designer Lead Free Faucet provides elegance and durability
- ✓ SHOK BLOK™ - Filter Protection Valve
- ✓ 4.5 Gallon Storage Tank
- ✓ NSF Certified Materials
- ✓ FLOWLOK™ - Leak Detector Water Shut Off Valve

BETTER THAN BOTTLED WATER AND AT YOUR FINGERTIPS!

Why lift and lug bottles?

Why purchase and lift heavy awkward to carry bottled water when you can have your own mini water bottling plant right under your kitchen sink! Keep your drinking water clean and safe with the BioShield Series Reverse Osmosis System. It reduces the levels of lead, nitrates, cysts (cryptosporidium, giardia), arsenic, sodium and other contaminants commonly found in unfiltered tap water. The easy to in-stall system offers quality water at your fingertips 24 hours a day, 7 days a week, 365 days per year. The BioShield Quick Change Cartridges makes filter changes fast, convenient and sanitary. Your family, friends and pets will love the taste and enjoy all the benefits of healthy water.

WATER FILTRATION IS SERIOUS BUSINESS!

Quality drinking water is not a matter of chance, it's a matter of choice! Essential Water firmly believes that when you have a good product there is no need to hype it or over promise. Our formula for success is quite simple; speak frankly to our customers, explain in simple terms why our product is better, produce a quality product that protects the health of its users and help one customer at a time solve their drinking water problems!

Our BioShield RO line of water filtration systems are simple to install and even easier to maintain. We want each and every one of our customers to enjoy all the benefits of having their own mini water bottling plant underneath their sink. Our compact design and our BioShield RO Quick Change Cartridges make filter change outs easy and convenient. Simply install any one of our BioShield RO water filtration systems and enjoy all the benefits of cleaner, safer, tastier more refreshing water, filtered at the point of use not days, weeks or even months before!

Reverse Osmosis/Activated Carbon Water Purification

Developed in the 50's to de-salinate sea water, Reverse Osmosis Membrane Separation Technology is widely recognized as the most effective method for the removal of mineral salts (TDS), heavy metals and organic chemicals from water. Dollar for dollar, no other water treatment method can remove the broad spectrum of contaminants and provide the overall water quality of a Reverse Osmosis System.

The Reverse Osmosis Process

The EWT Platinum Reverse Osmosis System's Exclusive Six Stage Process includes the following:

- Stage 1: Sediment Pre-filtration** - Graded density filter removes dirt, rust and sediment; particles 10 times smaller than the human eye can see.
- Stage 2: Block Carbon Pre-filtration** - Extruded block carbon filtration for increased contact time to remove chlorine, Ammonia and other related chemicals.
- Stage 3: Ultrafiltration** - Physically removes microscopic particles as small as 2 millionths of an inch.
- Stage 4: Reverse Osmosis** - Effectively removes Total Dissolved Solids (TDS), PFOS, PFOA, heavy metals and salts lead and sodium.
- Stage 5: Block Carbon Post-filtration** - Final polishing to assure the highest quality water possible.
- Stage 6: Re-mineralization** - Calcium & Magnesium is added to increase the Alkaline Level to 7.4 to 7.6 and to improve taste

The Many Applications and Uses of Purified Water and More!
