

Whole House Water Softening Systems

The Municipal Water Treatment Supplies in Southern California are heavily laddened with extremely high levels of hardness minerals. A Water Techniques Water Softening System installed on your homes water main will effectively remove these harmful minerals along with dirt, rust and sediment to protect your plumbing, faucets fixtures, appliances and stone counter tops. In addition, a Whole House Water Softening System will eliminate the soap film and scum that accumulates on your shower doors and dishware while eliminating the drying effects of soap flim on your skin and hair. Each of our Whole House Water Softening Systems are custom built to meet the individual needs and requirements of every home to assure proper flow rates without pressure drop.

The Key to Effeciency, Reliabilty and Savings:

- ▶ Fully Ported 1.25" Commercial Control valves for Greater Flow Rate and less pressure drop
- ▶ Five Cycle Control Valve, all Independently Adjustable
- ▶ Meter Controlled Demand Regeneration for Greater Efficiency
- ▶ Microprocessor controlled for accuracy
- ▶ Single Motor Driven Piston for Reliability
- ▶ Patented Fine Mesh Resin has Greater Capacity, uses less salt and water with 40% less pressure drop
- ▶ All materials of construction are National Sanitation Foundation

Patented Fine Mesh Resin

Specifications:

MODEL	SIZE	CU/FT	CAPACITY	FLOW RATE	DRAIN	MEDIA TANK	BRINE TANK	SALT CAPACITY
